CAMS Enterprise Update Release 14.0.10

Revision Date: 02/17/2012

This document describes the items that are being deployed in the 14.0.10 CAMS Enterprise Update Release. Enhancements, modifications, and system corrections are included and are categorized primarily by module. Those items needing CAMS Manager attention have been noted as such. For additional, detailed information and instructions on the functionality additions and changes, refer to the online help files located directly in the CAMS Enterprise application and/or the updated PDF manuals which can be downloaded from the CAMS Community Website. Note that portal updates are not automatically installed on your site and must be applied by your institution.

Financial Aid

1. Beginning with update 14.0.8 a Financial Aid Status record was required to manually add or edit an award in Financial Aid Maintenance. This is required so CAMS can correctly calculate the Origination Fee Percent and Interest Rebate Percent for COD DL Subsidized, DL Unsubsidized, and DL PLUS awards as it is set up in Award Reference. As this is only required for COD awards, Financial Aid Maintenance now will allow manually adding or editing a non-COD award. COD awards must still have a status record in order to calculate the COD amounts.

Tools

1. In update 14.0.9 the required field, Academic Year, was added to the PowerFAIDS import window. This enables CAMS to calculate the COD Origination Fee Percent and Interest Rebate Percent that is set up in Award Reference for the Academic Year. COD Awards must have a Financial Aid Status record created in order to link the award with the correct Academic Year in Award Reference. A required field, Financial Aid Year has been added to the PowerFAIDS import to allow CAMS to create the Financial Aid Status record for new awards during the PowerFAIDS import.
