CAMS Enterprise Update Release 14.3.3

Revision Date: 06/27/2013

This document describes the items that are being deployed in the 14.3.3 CAMS Enterprise Update Release. Enhancements, modifications, and system corrections are included and are categorized primarily by module. Those items needing CAMS Manager attention have been noted as such. For additional, detailed information and instructions on the functionality additions and changes, refer to the online help files located directly in the CAMS Enterprise application and/or the updated PDF manuals which can be downloaded from the CAMS Community Website. Note that portal updates are not automatically installed on your site and must be applied by your institution.

Tools

1. Update 14.3.2 added the ability to set up multiple Yearly COD Parameters in Award Reference. This has been additionally enhanced to allow Award Distribution Dates to extend prior to and after the dates set in the default Yearly COD Parameter in order to allow setup for loans that cross Academic Years.

2. An error occurred when exporting COD if a Pell award with an Ability to Benefit code was in the export. COD export will now correctly export all awards with Ability to Benefit data.
